

Poultry Health, Climate and Feed Training

Are you looking for both a theoretical as well as a practical poultry training course to expand your knowledge? GD Animal Health and PTC⁺ provide a basic training on Poultry Health, Climate and Feed.

Target audience

The programme is specifically developed for poultry veterinarians at the beginning of their career, poultry farm managers, and other interested parties.

Programme

This course is organized by GD Animal Health and PTC⁺ in order to offer a practical and interactive course. The training course includes lectures, practical trainings, demonstrations and farm visits. Besides lectures also cases, post mortem and sampling techniques demonstrations are part of the program. During the days at PTC⁺ the focus will be on climate, feed and housing. Next to lectures, this will include visits to commercial farms.

Please find the programme overview on this leaflet's back side.
